

I am a satellite radio subscriber. I pay for satellite radio because I like to stay informed.  
I listen to music, news and weather.

Having weather reports is very helpful and reassuring when travelling during the winter and during the stormy months of the year. I like to know in advance about the weather in the location where I am travelling to.

The antiquated way of looking for a radio station on the AM/FM band is very cumbersome and in most rural communities through out the U.S., this search is futile.

If XM has the technical ability to deliver content to me, I should be able to get it based solely on the fact that I am a paying customer.

Please oppose HR 4016!

Thank-you,

Patti Gentilini
